From: Lawrence S. Kleiger
312 Mar Vista Dr.
Los Osos, CA 93402

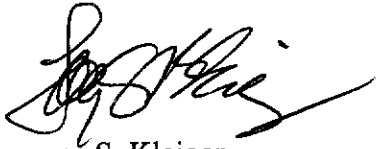

The follow documents are evidence that the home at 312 Mar Vista in Los Osos has been selected to cease and desist from discharging water into the ground as means of punishment and has little or no value towards the reduction of nitrates in the water system in our community.

A list of documents are included in this packet as well as reference to documents on file at the water board office and the Los Osos C.S.D.

The basis for my request for a hearing is:

1. The CRWQCB is clearly punishing a select (random) group of citizens in order to motivate the citizens to put pressure on the LOCSD to build a sewer or step down. Our family has been put on that list.
2. We request that our home at 312 Mar Vista be removed from the list of home with a CDO pending because our septic system is over 30 feet above ground water, thereby not adding nitrates to the water system at all. See map numbers 1 and 2.
3. There are no less than six new homes currently being build less than 300 yards from our home. Each of these new homes has a septic system being lowered into the ground at the present time. (see photos) Although theses homes must have been permitted some time ago, it simply adds insult to injury that new septic systems are being allowed to begin operation while our home that we have owned for over 20 years can't continue to operate as we have. We were not informed when we bought our home that 20 years later we could expect a CDO while our neighbors could build new homes and use their systems.
4. We will introduce documents that show that the CRWQCB was in a rush to apply unfair pressure on our family as part of the plan to pressure us into action. The CRWQCB did not follow their own guidelines and it appears they are attempting to deny us some of our rights as citizens and property owners.
5. I wish to have clean water now and for future generations in Los Osos. I would agree to pumping our tank every two months if that really helped. I don't believe it will, however, I will be glad to comply and prove that to the board with receipts from the pumping company. A CDO has negative impact that reach well beyond the scope of pumping and that once again, is unfair and punishment.
6. The psychological affects of this punishment remain to be determined. Spending a lifetime working to provide a home to raise a family and pass

along to our children appears to be greatly compromised. Our family can not possibly change the amount of pollutants going into the bay yet our property is being marked as undesirable. Are any members of the water board on the list for a CDO? How about their families? How about close friends? As a native resident of California for 55 years, living in this time of war, with all my heart I believe this act by the water board is a form of terrorism.

A handwritten signature in black ink, appearing to read 'Lawrence S. Kleiger', with a stylized, cursive script.
